

A8 Belfast - Larne Case Study

Project

In 2012 construction of the £130M A8 Belfast to Larne 14.5KM upgrade began. A joint venture of Lagans, Ferrovial and Costain were awarded as main contractors on the project.

Brief

Tracey Concrete were selected as suppliers of the concrete drainage products. Delivering and supplying spigot and socket pipes, manhole rings and cover slabs and precast headwalls to meet the contractor's targets.
