

c336 Paddington, Cross Rail - London

In 2015 as part of Costain's Marcon Sewer Enabling Works AE Yates won the contract to install 4No drives of DN600mm Jacking Pipes underneath the A40 and beside the Hammersmith & Circle Underground Line.

Tracey Concrete were selected to supply the 600mm Jacking Pipes on the Project. Working closely with AE Yates engineers our logistics team were able to meet the exact delivery times set by Cross rail.
