Langley Court, London - Roadbridge UK

In 2015 Roadbridge UK were awarded the groundworks for first phase of the new Langley Court Development Project in Beckenham, London. The overall project is to develop 179 homes, a medical surgery and Sports Academy. Tracey Concrete won the supply of the drainage materials - Perfect Bases, Watertight Manholes & Catchpits.
The Perfect Base was a great time saver onsite as no onsite benching was required. Combined with Tracey’s watertight manhole system no concrete surround was required. Each manhole was installed in a fraction of the time compared to standard manhole rings.
