

## Titanic Project Case Study

### Project

In 2009 Harcourt Construction were named as the main contractor for the £100 million Titanic Signature Building in Belfast, Northern Ireland.

### Brief

Tracey Concrete were chosen as suppliers of the concrete drainage products. With a tight deadline to have the project finished Tracey Concrete's efficient team helped ensure Harcourt Construction that the project would be completed on time. Delivering spigot and socket pipes in sizes from DN 225-1050mm and manhole rings and cover slabs from DN 900-2700mm to site.

The Titanic Signature Building is an Irish iconic landmark and Tracey Concrete are proud to have contributed to its construction.
